Proprietary

- · Chemical characterization: Mixtures
- · Description: Mixture of the substances listed below with nonhazardous additions.

· Dangerous components:

Mineral Acid Salt of Organic Amide

### 4 First-aid measures

#### · Description of first aid measures

• General information:

Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

- After inhalation: Supply fresh air; consult doctor in case of complaints.
- · After skin contact: Generally the product does not irritate the skin.
- After eye contact:
- Remove contact lenses if able to do so.
- Rinse opened eye for several minutes under running water. Then consult a doctor.

• After swallowing:

Do not induce vomiting; immediately call for medical help.

Rinse out mouth and then drink plenty of water.

Drink large amounts of calcium based antacid followed by milk of magnesia or milk.

A person vomiting while lying on their back should be turned onto their side.

Immediately call a doctor.

• Information for doctor:

• Most important symptoms and effects, both acute and delayed Gastric or intestinal disorders

· Indication of any immediate medical attention and special treatment needed

Administer Milk of Magnesia or Milk and other non-alcoholic liquids as available. DO NOT INDUCE VOMITING!

Medical supervision for at least 48 hours.

#### **5** Fire-fighting measures

- · Extinguishing media
- Suitable extinguishing agents: Use fire fighting measures that suit the environment.
- · Special hazards arising from the substance or mixture Hydrogen chloride (HCl)
- · Advice for firefighters
- · Protective equipment:

Firefighters should wear NIOSH/MSHA approved self-contained breathing apparatus and full protective clothing.

#### 6 Accidental release measures

- Personal precautions, protective equipment and emergency procedures
   Particular danger of slipping on leaked/spilled product.
   Use respiratory protective device against the effects of fumes/dust/aerosol.
   Wear protective equipment. Keep unprotected persons away.
   Environmental precautions: Dilute with plenty of water.
- Methods and material for containment and cleaning up:
   Clean the affected area carefully; suitable cleaners are:
   Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).
   Use neutralizing agent.
   Dispose contaminated material as waste according to item 13.
- · Reference to other sections
- See Section 7 for information on safe handling.
- See Section 8 for information on personal protection equipment.
- See Section 13 for disposal information.

### 7 Handling and storage

- · Handling:
- · Precautions for safe handling Avoid splashes or spray in enclosed areas.
- · Information about protection against explosions and fires: No special measures required.
- · Conditions for safe storage, including any incompatibilities
- · Storage:
- Requirements to be met by storerooms and receptacles: Unsuitable material for receptacle: steel. Unsuitable material for receptacle: aluminium.
   Information about storage in one common storage facility:
- Store away from foodstuffs.
- Store away from oxidizing agents.
- Further information about storage conditions: Store receptacle in a well ventilated area. Keep receptacle tightly sealed. Specific and unc(a) No further relevant information and
- Specific end use(s) No further relevant information available.

#### 8 Exposure controls/personal protection

- · Additional information about design of technical systems: No further data; see item 7.
- · Control parameters
- · Components with limit values that require monitoring at the workplace:
- The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.
- · Additional information: The lists that were valid during the creation were used as basis.
- · Exposure controls
- · Personal protective equipment:
- General protective and hygienic measures: Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing. Wash hands before breaks and at the end of work. Avoid contact with the eyes. Avoid contact with the eyes and skin.
- Breathing equipment: Not required.
- Protection of hands:

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

- Material of gloves
- Nitrile rubber, NBR

Neoprene gloves

Butyl rubber, BR

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

- · Not suitable are gloves made of the following materials:
- Strong gloves
- Leather gloves
- · Eye protection: Safety glasses
- · Body protection: Protective work clothing

### **10 Stability and reactivity**

• *Reactivity* No further relevant information available.

· Chemical stability

- Thermal decomposition / conditions to be avoided: No decomposition if used according to specifications.
- · Possibility of hazardous reactions
- Reacts with aluminium at raised temperatures.

Reacts with metals forming hydrogen.

Reacts with strong oxidizing agents.

- Reacts with strong alkali.
- Conditions to avoid No further relevant information available.
- · Incompatible materials: No further relevant information available.

• Hazardous decomposition products: Hydrogen Carbon monoxide and carbon dioxide

#### **11 Toxicological information**

· Information on toxicological effects

· Acute toxicity:

• Primary irritant effect:

- on the skin: No irritant effect.
- on the eye: Strong irritant with the danger of severe eye injury.
- · Sensitization: No sensitizing effects known.
- Additional toxicological information:

The product shows the following dangers according to internally approved calculation methods for preparations: Harmful

Irritant

#### · Carcinogenic categories

· IARC (International Agency for Research on Cancer)

None of the ingredients is listed.

· NTP (National Toxicology Program)

no ingredient above de minimis level is listed

#### · OSHA-Ca (Occupational Safety & Health Administration)

None of the ingredients is listed.

### **12** Ecological information

· Toxicity

- · Aquatic toxicity: No further relevant information available.
- Persistence and degradability No further relevant information available.

· Behavior in environmental systems:

- · Bioaccumulative potential No further relevant information available.
- · Mobility in soil No further relevant information available.
- Additional ecological information:

· General notes:

Water hazard class 1 (Self-assessment): slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system. Must not reach bodies of water or drainage ditch undiluted or unneutralized.

Rinse off of bigger amounts into drains or the aquatic environment may lead to decreased pH-values. A low pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably increased, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.

· Results of PBT and vPvB assessment

· PBT: Not applicable.

• **vPvB:** Not applicable.

· Other adverse effects No further relevant information available.

### 13 Disposal considerations

· Waste treatment methods

· Recommendation:

Must not be disposed of together with household garbage. Do not allow product to reach waterways or storm sewers. Disposal must be made in accordance with local, state and federal regulations. Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

- · Uncleaned packagings:
- Recommendation: Disposal must be made according to official regulations.
- · Recommended cleansing agent: Water, if necessary with cleansing agents.
